

Task 3 Report Structure

- Marketing Funnel & Conversion Performance Analysis
- Data Science & Analytics Internship – Future Interns
- Submitted By:
 - Vanukuri.Dhathri
- Task 3
- Date:
 - 21 May 2026

Objective

- The objective of this project is to analyze marketing funnel data
- to identify conversion drop-offs, channel performance,
- and opportunities to improve customer conversion.

Dataset Information

- Dataset Information
- Dataset Name: Marketing Funnel Dataset
- Number of Rows: 5000+
- Important Columns:
 - Lead Source
 - Campaign Name
 - Clicks
 - Conversions
 - Revenue
 - Conversion Rate

Tools Used

- Tools & Technologies Used
- Python
- Pandas
- Matplotlib
- Power BI
- Jupyter Notebook
- VS Code

Data Cleaning

- Data Cleaning Process
 - Removed missing values
 - Checked duplicate records
 - Formatted date columns
 - Verified conversion metrics

Funnel Analysis

- **Insert:**
 - Funnel chart screenshot
 - Conversion graph
- **Insights:**
 - Significant drop-offs occurred during conversion stages
 - Some channels performed better than others
 - Funnel optimization can improve customer conversion

Example visuals:

Channel Conversion Rates

	Channel	ConversionRate
0	Facebook Ads	6
1	Google Ads	6.2222
2	Instagram	5.25
3	LinkedIn	6
4	Email Campaign	7.4286
5	Organic Search	8.3333

Key Metrics

Visitors	Leads	Conversions	Conversion Rate
26000	6250	1730	6.65%

Marketing Funnel

Channel Performance

- **Insert:**
- Bar chart
- Pie chart
- **Insights**

- Social media generated higher traffic
- Email marketing achieved better conversion rates
- Paid campaigns produced higher engagement

Recommendations

- Recommendations
 - Improve low-performing funnel stages
 - Optimize campaign targeting
 - Increase focus on high-converting channels
 - Monitor conversion metrics regularly

Conclusion

- Conclusion
- This project helped analyze marketing funnel performance
- and customer conversion behavior using data analytics techniques.
